WebDev Midterm Presentation

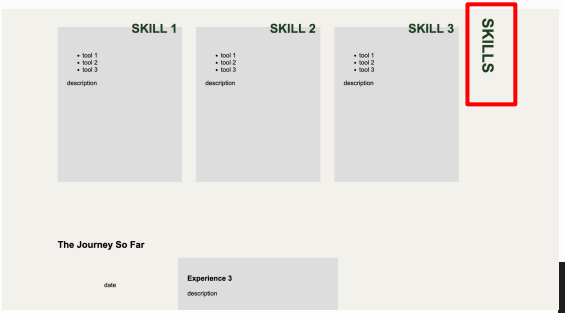

Rebecca Wang

A demo of the site

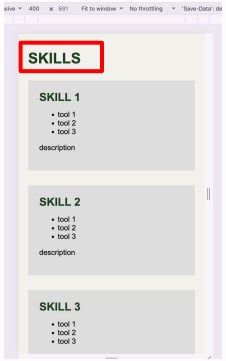

One snippet of code I figured out

Adapting CSS transforms for my Skills heading

```css
/* skills section title */
.skills-label h2 {
  width: 10rem;
  flex-shrink: 0;
  margin: 0;
  font-size: 2.5rem;
  line-height: 1;
  text-align: center;
  text-transform: uppercase;
  color: #203f23;
  transform: rotate(90deg);
}
```

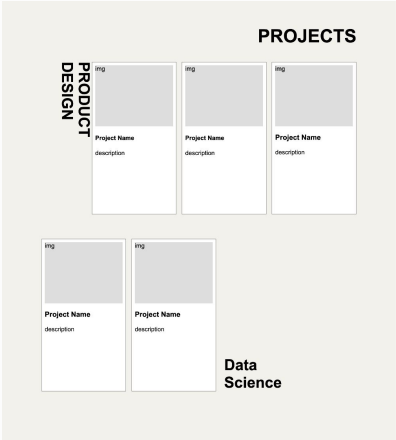

```css
.skills-label h2 {
  width: auto;
  transform: none;
  text-align: left;
  font-size: 2rem;
}
```

Responsive Layout
